MP’DUO®

DOUBLE-STATION SURGICAL SCRUB SINK

RELEVANT DEPARTMENTS:

Operating theatres | Intensive care units | Nephrology and haemodialysis | Surgeons’ preparation and recovery rooms | Emergency boxes | Neonatology unit |Nursing and healthcare staff rooms

Dual sterile washing, without compromise

The MP’DUO surgical scrub sink allows simultaneous washing for two users, thanks to its deep basin and enveloping design that limits splashing. Made from a robust and safe material, it is perfectly suited to demanding surgical environments. Sub-micron water treatment is recommended to reduce the risk of contamination.

Maintenance of filtration systems (UV, filters) is essential but should be designed to minimize interventions in sensitive areas. Centralized water treatment, through our MP’OPURE solution, ensures safety and continuous operation without disrupting surgical theatres.

The little details that make all the difference

The global benchmark for operating theatre

This surgical scrub sink, sold in several thousand units, equips hundreds of operating theatres worldwide.

Designed in a compact size for medical hygiene

Designed for optimal hygiene, this medical hand hygiene unit without overflow or gaps eliminates bacterial risk zones.

Reinforced protection

The high backsplash and side panels are designed to provide maximum protection to surrounding areas.

Simplified cleaning

Rounded edges with no sharp angles for easy cleaning, preventing water stagnation and residue buildup.

Antibacterial design

Wall-mounted faucet reducing contact zones and bacterial accumulation.

Suitable for technical use

The DUO surgical scrub sink with accessory rail keeps everything within reach, maintaining a dry and clean environment.

DOUBLE-STATION SURGICAL SCRUB SINK **ELECTRONIC COMMAND**

- **CLIC-FIT TERMINAL FILTER**
- **INNOVATIVE DESIGN, OPTIMAL HYGIENE**
- **INNOVATIVE MATERIALS**

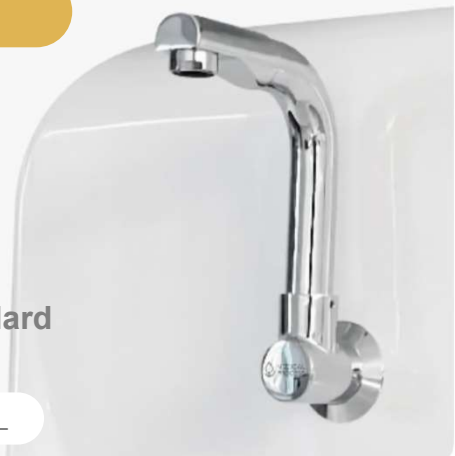
Material

Reinforced polyester with sanitary coating, molded in one block. Designed for optimal hygiene, this washbasin has no overflow, and no gaps, and limits zones with high bacterial risks.

TYPE OF COMMAND

Infrared Electronic

TAP



MEDICAL PROCESS

New standard Tap

LARGE MODEL

Standard equipment

- 2 IR Sensors with presence detection
  - Dual power supply, either with batteries or AC.
  - Includes automatic flush (6h/12h/Off)
  - Easy setting with remote
  - Control box with easy clip-on for maintenance
- 2 standard detachable taps chromed brass
- 1 Ø40mm siphon connection
- 1 flow limiting valve
- Flexibles connection hoses
- Stainless steel mounting kit

Optional accessories

- Straight tap
- Thermostatic mixer with anti-burn security
- Prefiltering kit with 1µ cartridge
- Terminal filter 0.2µ
- Aluminum rail for accessories support
- Refillable soap/SHA dispenser – Elbow command
- Refillable soap/SHA dispenser – Automatic command
- AirLess soap dispenser – Elbow command
- Paper towel dispenser
- UV water disinfection kit 33W
- Surgical nail brushes dispenser
- Basket for hygiene accessories
- On/off button
